Additional Skills

- MS Office
- Solidworks/AutoCad
- Siemens NX
- Programming in C

Professional Summary

I have over 8 years of experience in teaching Mathematics for middle and high school students. I worked at the British Embassy School of Ankara as a TA for Year 4 and a booster mathematics teacher for Year 6, before moving to Estonia. I specialize in teaching IB and IGCSE curriculum, having graduated from those myself as well, I went on to study Electrical and Electronics engineering at Hacettepe University and now studying Integrated Engineering at Tallinn University of Technology, I am also going to be doing a PGCE course this coming academic year.

I worked privately with students from four different international schools in Ankara and had great success with them, since moving to Tallinn, I have been continuing to work with my students in Turkey through an online distance learning program which has given me a lot of experience in distance learning and has been just as efficient and productive for the students. I have my own website where I keep all my resources for students to use and obtain their homeworks and class notes, making it a very efficient and easy to use platform.

Work Experience

03/2010 - 09/2014
